

H. Eugene Stanley — Curriculum Vitae & Selected Publications — 13 April 2017

Born 28 March 1941, in Oklahoma City, Oklahoma

D.Sc. (hon.), University of Leicester (UK), 2017
D.Sc. (hon.), Universidade Federal do Rio Grande do Norte (Natal, Brazil), 2016
D.Sc. (hon.), Universidad Federal de Ceara, (Fortaleza.Brazil),2013
D.Sc. (hon.), Institute for Advanced Studies (Lucca, Italy), 2012
D.Sc. (hon.), University of Messina (Italy), 2009
D.Sc. (hon.), Northwestern University (Evanston,IL), 2009
D.Sc. (hon.), University of Wroclaw (Poland), 2004
D.Sc. (hon.), University of Dortmund (Germany), 2001
D.Sc. (hon.), University of Liège (Belgium), 2001
D.Sc. (hon.), Eötvös Loránd University (Budapest, Hungary), 1997
D.Sc. (hon.), Bar-Ilan University (Ramat-Gan, Israel), 1994
Ph.D., Harvard University (T.A. Kaplan & Nobelist J.H.Van Vleck, supervisors), 1967
Fulbright-supported research, Univ. Köln, Germany (Nobelist Max Delbrück, supervisor),1963
B.A., Wesleyan University, Middletown, CT, USA (T.A. Green, supervisor), 1962

William Fairfield Warren Distinguished Professor, Boston University, 2011–
Lorentz Professor, University of Leiden, Spring 2013
Affiliate Faculty Member, Rafik B. Hariri Institute for Computing and Computational Science & Engineering, 2013–
Honorary Professor, Shanghai University, 2011–
Honorary Professor, East China University of Science & Technology, 2011–
Professor of Chemistry, Boston University, 2007–
Professor of Biomedical Engineering, Boston University, 2007–
Honorary Professor, Institute for Advanced Studies, University of Pavia, 2004–
Honorary Professor, Eötvös Loránd University, Budapest, Hungary 1997–
University Professor, Boston University, 1979–2011
Joliot Curie Visiting Professor, Ecole Supérieure de Physique et Chimie, 1979
Professor of Physiology, Boston University School of Medicine, 1978–
Director, Center for Polymer Studies, Boston University, 1978–
Professor of Physics, Boston University, 1976–
Herman von Helmholtz Assoc. Prof. of Health Sciences & Tech., M.I.T., 1973–1976
Associate Professor of Physics, M.I.T., 1971–1976
Assistant Professor of Physics, M.I.T., 1969–1971
Miller Fellow, (Charles Kittel, Supervisor), Univ. Calif., Berkeley, 1968–1969
Research Associate, M.I.T., Lincoln Laboratory, 1967–1969

Senior Award, European Complex Systems Society, 2014
Julius Edgar Lilienfeld Prize, American Physical Society, 2008
Zenith Fellow Award, The Alzheimer Association (with D. B. Teplow), 2005
Elected Member, National Academy of Sciences (USA), 2004
Boltzmann Medal, Int'l. Union of Pure and Applied Physics (IUPAP), 2004
Teresiana Medal in Complex Systems Research, University of Pavia, 2004
Jury, “Women in Science Prize” (UNESCO/L’Oreal): 2013,2011,2009,2007,2005,2003
Jury, “Women in Science USA Prize” (L’Oreal):2013,2012,2011,2010,2009,2008,2007,2006
Nicholson Medal, American Physical Society, 2003
Elected *Foreign Member*, *Brazilian Acad. Sciences*, 2002
Distinguished Teacher-Scholar Award, NSF Director’s Award, 2001
Memory Ride Award for Alzheimer Research (with B. T. Hyman), 2001
David Turnbull Prize, Materials Research Society, 1998
Floyd K. Richtmyer Prize, AAPT, 1997
Honorary Member, Hungarian Physical Society, 1996
Fellow, American Association for the Advancement of Science, 1994

Massachusetts Professor of the Year, 1992
BP Venture Research Award (with J. Teixeira), 1989
Fellow, American Physical Society, 1974
John Simon Guggenheim Memorial Fellowship, 1979–1980
Choice Award for Outstanding Academic Book, 1971

One metric for impact is the Hirsch Index. ISI Web of Science, lists 75,208 citations to 1215 publications (excluding 33 books)—available online at <http://polymer.bu.edu/hes/>. Of these, the PI has authored 131 papers with citation count than rank, so $H = 131$. Hirsch [PNAS **102**, 16569 (2005)] names no physicist with $H > 131$. Itemized in <http://polymer.bu.edu/hes/articles/highlycited.html>. *Science Citation Index*: 84,166 ISI Web of Science citations: 73,166 to 1202 ISI articles—available online at <http://polymer.bu.edu/hes/>—and 9011 to 8 books. Google Scholar lists 129,361 citations, of which 160 have citation count larger than rank, so $H = 160$.

van Leeuwenhoek Lecture, Leiden, 2014
Ehrenfest Colloquium (100th Anniversary), University of Leiden, 2013
Ramanujan Memorial Lecture, Calcutta, 2012
John G. Kirkwood Memorial Lecture, Kanpur, 2010
Platinum Jubilee Lectures, Indian Academy of Sciences, 2009
Karlheinz Schmidt Memorial Lecture, Chiemsee, Germany, 2009
Sigma Xi National Lecturer, 2002–2003
Centennial Lecturer, American Physical Society, 1999
Eötvös Lecturer, Eötvös Loránd Univ. (Budapest, Hungary), 1997
Professor at Large, Japan Society for the Promotion of Science, 1995 and 1975
Thirtieth Saha Memorial Lecture, Calcutta, India 1992
Fourth Bose Memorial Lecture, Calcutta, India 1992
University Lecturer, Boston University, 1991
Distinguished Visiting Lecturer, Seoul National University, 1982
Distinguished Visiting Lecturer, Peking University, 1981
Distinguished Lecturer, University of Toronto, 1977

Appointed, *Board of External Experts*, NIH Heart, Lung & Blood Inst, 2011–present
Appointed, Advisory Board *International Center for Dynamical Biomarkers & Translational Medicine (CDBTM)*, National Central University, Taiwan, 2012–
Appointed, Nominating Committee, Japan Prize, 2011–present
Chair, *National Academy of Sciences/Keck Futures Initiative on Complexity*, 2008
National Academy of Sciences (NAS) Committee *Forefronts of Science at the Interface of Physical and Life Sciences*, operated under the auspices of the NRC Board of Life Sciences and the NRC Board on Physics and Astronomy, 2007–2009
NAS Committee *Committee on Experimentation and Rapid Prototyping in Support of Counterterrorism* 2007–2009
NAS Committee *Role of Naval Forces in the Global War on Terror*, 2005–2007
Co-Director, three Enrico Fermi Schools of Physics (Varenna, Italy): 2010, 2003, 1996
Co-Director, two NATO Adv. Res. Workshops: 2001 (Moscow), 1999 (Budapest)
Chair, Gordon Research Conference (Water and Aqueous Solutions), 1998
Co-Director, three NATO Advanced Study Institutes (Cargèse): 1990, 1988, 1985
Member, NAS Research Briefing Panel on Order, Chaos, and Patterns, 1987
Chair, IUPAP Conf. on Thermo. & Stat. Mechanics (STATPHYS-16), 1986

Physica A (Elsevier), Co-Editor-in-Chief (with Dawson, Indekeu, Parisi, and Tsallis)
Graduate Texts in Physics, Springer-Verlag (Editor in Chief)
International Review of Pure and Applied Physics (IRPAP), Honorary Editor
Quantitative Finance, Editorial Board
International Journal of Molecular Sciences (IJMS), Editorial Board
Int. J. Theor. & Appl. Finance (World Scientific Publishers), Editorial Board
Finance and Economics Editorial Boards Network An Independent Social Network for Journal Board Members in Finance and Economics, Member
Granular Matter (Springer-Verlag), Editorial Board

Fractals (World Scientific Publishers), Editorial Board
Nuclear Physics B (Elsevier), Editorial Board, 1987–1997
New Journal of Physics (Institute of Physics, UK), Editorial Board
Fluctuation and Noise Letters (World Scientific Publishers), Editorial Board
Complexus: Modelling and Understanding Functional Interactions in Life Sciences
Nonlinear Dynamics, Psychology, and Life Sciences
Graduate Texts in Contemporary Physics (Springer), Co-Editor, 1988–2005
Partially Ordered Systems (Springer book series), Co-Editor

113 Ph.D. Theses Supervised, of whom 20 are women

Gerald Paul (M.I.T.), Sava Milos Milošević (M.I.T.), Koichiro Matsuno (M.I.T.), Judith Herzfeld (M.I.T.), Alexander Maurice Alers Hankey (M.I.T.), Richard A. C. Krasnow (M.I.T.), David Noel Lambeth (M.I.T.), Fredric Ira Harbus (M.I.T.), Douglas Karo (M.I.T.), Chiu Shuen Hui (M.I.T.), Kenneth J. Rothschild (M.I.T.), Luke Lokia Liu (Johns Hopkins University, with R. I. Joseph), Rama Daga Bansil (University of Rochester, with E. W. Montroll), Samuel A. Ellias (M.I.T., with S. Grossberg), Jeffrey F. Nicoll (M.I.T.), George F. Tuthill (M.I.T.), Sidney Redner (M.I.T./Boston University), Peter J. Reynolds (M.I.T./Boston University), Hisao Nakanishi (Harvard University, with B. I. Halperin), Agustin Gonzalez, Alla Margolina, Edward T. Gawlinski, İmtiaz Majid, Zorica Djordjevic, Daniel Hong, Cettina Amitrano (University of Naples, with A. Coniglio), Pierre Devillard, Robin L. Blumberg Selinger (Harvard University, with B. I. Halperin), Dimitris Stassinopoulos, Jysoo Lee, Frank Caserta, Peter H. Poole, Mariela Araujo, Greg Huber, Sharon C. Glotzer, Chung-Kang Peng, Hernan Larralde, Srikanth Sastry, Sona Prakash, Stefan Schwarzer, Albert-László Barabási, Luis A. N. Amaral, Veronica Johow, Hernán A. Makse, Gandhi Viswanathan, Steven T. Harrington, Stefan Zapperi, Reza Sadr, Plamen Ivanov, Francis Starr, Nikolay Dokholyan, Yanhui Liu, Ivo Grosse, Vivienne Plerou (Boston College), Parameswaran Gopikrishnan, Antonio Scala, Emilia La Nave, Masako Yamada, Anna Skibinsky, Feng Ding, Chung C. Lo, Nicolas Giovambattista, Jose Borreguero, Kun Hu, Kaushik Matia, Zhi Chen, Eduardo Lopez, Shouyong Peng, Sameet Sreenivasan, Sijung Yun, Pradeep Kumar, Limei Xu, Dongfeng Fu, Zhenhua Wu, Alfonso Lam, Zhenyu Yan, Yiping Chen, Marco Mazza, Arnab Majumdar, Fengzhong Wang, Maksim Kitsak, Irena Vodenska, Andrew Inglis, Sungho Han, Jia Shao, Alexander Petersen, Tobias Kesselring (with H.J. Herrmann), Joel Tenenbaum, Elena Strekalova (with G. Franzese), Mark Dickison, Jianxi Gao (with S. Havlin), Kevin Stokely, Guanliang Li, Jiayuan Luo, Xuqing Huang, Wei Li, Feng Ling (with Baowen Li), Erik Lascaris, Qian Li, Will Morrison, Duan Wang, Chester Curme, Shuai Shao, Antonio Majdandzic, Nima Dehmamy, *Pending*: Adam Avakian Joao Ricardo Santos, Xin Yuan, Asher Mullokandov, Alex Becker, Nagendra Panduranga Jing-Jin Wei,

173 Visiting Researchers and Research Associates

M. Howard Lee (M.I.T.), Ruth Ditzian (now Ruth Ditzian-Kadanoff) (M.I.T.), Chikao Kawabata (M.I.T.), Thomas C. Chang (M.I.T.), George D.J. Phillies (M.I.T.), Irwin M. Asher (M.I.T.), Jos Rogiers (M.I.T.), Vittold Yurkevich (M.I.T.), William Klein, Alan S. Brown, Antonio Coniglio, Shunichi Muto, Izumi Nishio, Rosemary Sanchez, Pilar Ruiz, Dietrich Stauffer, Walter Selke, Don Shalatin, Naem Jan, Ikuo Ono, Zhan-ru Yang, Alfons Geiger, Fereydoon Family, Mohamed Daoud, Peter Mausbach, Zeev Alexandrowicz, Constantino Tsallis, Ivan P. Fittipaldi, Roberto dos Santos, Daniel Ben-Avraham, Francois Leyvraz, Armin Bunde, F. Y. Wu, Leo Moseley, Robin J. Speedy, Viktor Chukanov, Sasuke Miyazima, Paul Trunfio, Sergey V. Buldyrev, Preben Alstrom, Francesco Sciortino, Ulrich Essmann, Linda S. Shore, Edwin F. Taylor, Borko Stosic, Ivan Fittipaldi, Pablo Jensen, Mark F. Gyure, Peter Ossadnik, Martina Ossadnik, Rosario N. Mantegna, Philip Maass, Peter Garik, Michael Rosenblum, Kent Lauritsen, J. K. Nielsen, Rodolfo Cuerno, Francisco Brady, Martin Meyer, Heiko Leschhorn, Luciano Da Silva, Hiroko Kitaoka,

Enrique Cabarcos, Pierre Cizeau, Murat Canpolat, Carlos Argolo, Jose Cressoni, Jan Karbowski, Harald Kallabis, Luis Amaral, Arieh Ben-Naim, Thadeu Penna, Luis Cruz-Cruz, Brigita Urbanc, Youngki Lee, Marc Barthelemy, Pedro Bernaola, Giancarlo Franzese, Alessandro Chessa, Bernd Rosenow, Dietrich Wolf, Marcia C. B. Barbosa, Francisco de los Santos Fernandez, Verena Schulte-Frohlinde, Masaki Hoshiyama, Paulo Netz, Gerald Paul, Boris Podobnik, Francisco Sales, Yossi Ashkenazy, Stefano Mossa, Masaki Hoshiyama, Lidia Braunstein, Manuel Marques, Andre Auto-Moreira, Don R. Baker, Kensuke Fukuda, Miguel de la Casa, Roberto Consiglio, Jan W. Kantelhardt, Toshihiro Tanizawa, Kazuko Yamasaki, Philipp Weber, Jan Nagler, Gennady Genkin, Woo-Sung Jung, Daniel T. Schmitt, Eudeniilson Albuquerque, Yougui Wang, Nelido Gonzalez-Segredo, Yinlin Xu, Moo-Young Choi, Joon-Young Moon, Shwu-Jane Shieh, Fabio Pammolli, Massimo Riccaboni, Sadha Moodley, Pandelis Perakakis, Fengzhong Wang, Laurent Seuront, Jianxi Gao, Wenqi Duan, Yusong Tu, Dario Corradini, Tobias Preis, Takashi Shimada, Jiping Huang, Mario Bertella, Jonathas Silva, Helen Susannah Moat, Gaogao Dong, Zhiqiang Jiang, Rujin Du, Huijuan Wang, Dror Y. Kenett, J. S. Andrade Jr, Xin (Siva) Zhang, Wen Fang, Mei-Chu (Maggie) Chang, Chang-Shuai Li, Xiaojun Zhao, Simone Mainardi, Tolga Ulusoy, Paolo Sgrignoli, Jean Wu, Henio Aragao, Carles Calero, Xiaobing Feng, Sary Levy-Carciente, Qianming Zhang, Ying-Hui Shao, Youzhao Gou, Linyuan Lu, Gao Li, Gang Sun, Josef Ludescher, Wenjie Jia, Tomislav Lipic, Qiang Li, Xueming Liu, Shinan Cao, Yinan Jiang, Zhen Su, Chuang Liu, Liang Eric Tang, Yong Tao, Gang-Jin Wang, Weiqiang Huang, Qingju Fan, Askery Alexandre Canabarro, Yuhao Qin, Zhesi Shen, Min Lin, Yufan Lu, Wenyi Fang, Yachun Gao, and Linfeng Zhong.

8 Books, Listed in Rank Order by Citation Count

- (i) H. E. Stanley, *Introduction to Phase Transitions and Critical Phenomena*, “International Series of Monographs on Physics” (Oxford University Press, Oxford and New York 1971). Translated into Russian by S. V. Vonsovsky (MIR, Moscow, 1973); translated into Japanese by K. Matsuno (Tokyo Tosho, Tokyo, 1974). **Citations:** 7033 (3684 cited correctly, 1434 cited as Eugene Stanley, 1242 with the year of the reprint, 1971, rest cited under different years, different titles, and with various typing mistakes).
- (ii) A.-L. Barabasi and H. E. Stanley, *Fractal Concepts in Surface Growth* (Cambridge University Press, Cambridge, 1995). Adoptions: *Library of Science Book Club*. Citations: 3181 (2926 cited correctly; rest cited under different years and titles)
- (iii) R. N. Mantegna and H. E. Stanley, *Introduction to Econophysics: Correlations & Complexity in Finance* (Cambridge University Press, Cambridge, 2000). Japanese Translation: Masumi Nakajima (Economist-sha, Tokyo 2000); Polish Translation: R. Kutner (2001); Chinese translation: Liang Jing (2002). Indonesian Translation: Y. Surya (2002). Russian Translation: Alexandr Ezhov (2007). **Citations:** 1611 (792 cited correctly, with subtitle, 383 without subtitle, 341 with publication year 1999, rest cited other ways).
- (iv) D. Stauffer and H. E. Stanley, *From Newton to Mandelbrot: A Primer in Theoretical Physics* (Springer Verlag, Heidelberg, 1990). Translated into Japanese, Hungarian and Polish. *Second Edition: 1996. Third Edition* (with A. Lesne): *2017*. Expanded French Edition: D. Stauffer, H. E. Stanley, and A. Lesne, *Cour de Physique: De Newton à Mandelbrot* (Springer France, Paris, 1999).
- (v) E. Guyon and H. E. Stanley, *Les Formes Fractales* [English translation: *Fractal Forms*] (Elsevier North Holland, Amsterdam, 1991). Catalog for an exhibit *Les Formes Fractales* (Palais de la Découverte, Paris, 1991).

- (vi) K. Brecher, S. V. Buldyrev, P. Garik, S. M. Milošević, H. E. Stanley, E. F. Taylor, and P. A. Trunfio, *Fractals in Science* (Springer Verlag, Berlin, 1994).
- (vii) G. M. Viswanathan, M. G. E. da Luz, E. P. Raposo, and H. E. Stanley, *The Physics of Foraging* (Cambridge University Press, Cambridge, 2011). *Reviews*: N. Watkins, *Physics Today* **65**(1), 44 (2012). **Citations**: 249
- (viii) S. V. Buldyrev, F. Pammolli, M. Riccaboni, and H. E. Stanley, *The Growth & Instability of Economic Systems* (in completion stage).

24 Edited Volumes, Listed Chronologically

- (i) H. E. Stanley, ed., *Biomedical Physics and Biomaterials Science* (M.I.T. Press, Cambridge, 1972).
- (ii) H. E. Stanley, ed., *Cooperative Phenomena near Phase Transitions* (M.I.T. Press, Cambridge, 1973).
- (iii) H. E. Stanley and N. Ostrowsky, eds., *On Growth and Form: Fractal and Nonfractal Patterns in Physics* (Proc. 1985 Cargèse NATO ASI, Series E: Appl. Sciences, Vol 100). Martinus Nijhoff Publishers, Dordrecht, 1986. Citations: 523 [246 cited correctly, rest with various errors]
- (iv) H. E. Stanley, ed., *Statistical Physics* (Proc. STATPHYS-16, IUPAP Intl. Conf. on Thermodynamics & Statistical Mechanics, Boston University, 11-15 Aug 1986) North-Holland Physics, Amsterdam, 1986.
- (v) H. E. Stanley and N. Ostrowsky, eds., *Random Fluctuations and Pattern Growth: Experiments & Theory* (Proc. 1988 Cargèse NATO ASI Series E: Appl. Sciences, Vol 157). Kluwer Academic Publishers, Dordrecht, 1988. Citations: 157 [141 cited correctly + 16 with various mis-spellings.
- (vi) H. E. Stanley and N. Ostrowsky, eds., *Correlations & Connectivity: Geometric Aspects of Physics, Chemistry & Biology* (Proc. 1990 Cargèse NATO ASI, Series E: Appl. Sciences, Vol 188). Kluwer Academic Publishers, Dordrecht, 1990. Citations: 29
- (vii) H. Z. Cummins, D. J. Durian, D. L. Johnson, and H. E. Stanley, eds., *Disordered Materials and Interfaces* (Materials Research Society, Pittsburgh, 1996).
- (viii) F. Mallamace and H. E. Stanley, eds., *Physics of Complex Systems: Proc. 1996 Enrico Fermi School on Physics, Course CXXXIV* (Soc. It. Fisica, Bologna, 1997).
- (ix) C. M. Knobler, A. Robledo, and H. E. Stanley, eds., *Statistical Mechanics in the Physical, Biological, and Social Sciences: Festschrift in Honor of Benjamin Widom on the occasion of his 70th Birthday* (Elsevier, Amsterdam, 1997). [Special issue of *Physica A*, vol. **244**, pp. 1-544.]
- (x) A. Gadomski, J. Kertesz, H. E. Stanley, and N. Vanderwalle, eds., *Applications of Statistical Physics: Proc. NATO Advanced Research Workshop, Budapest* (Elsevier, Amsterdam, 1999).
- (xi) J. L. Green, C. T. Moynihan, R. J. Speedy, H. E. Stanley, and L. M. Torell, eds., *C. Austen Angell Festschrift* [*J. Phys. Chem. B* **103**, No. 20, 20 May 1999].

- (xii) H. E. Stanley, M. Aizenman, B. Jancovici, O. Penrose, and J. Percus, eds., *Statistical Mechanics: From Rigorous Results to Applications: Festschrift in Honor of Joel L. Lebowitz on the occasion of his 70th Birthday* (Elsevier, Amsterdam, 2000). [Special issue of Physica A, vol. **279**, pp. 1-486.]
- (xiii) M. Tokuyama and H. E. Stanley, eds., *Statistical Physics—3rd Tohwa University Intl. Conf.* (AIP Conf. Series, Volume 519, 2000).
- (xiv) Y. Taniguchi, H. E. Stanley, and H. Ludwig, eds., *Biological Systems under Extreme Conditions: Structure and Function* (Springer-Verlag, Heidelberg, 2002).
- (xv) V. Brazhkin, S. V. Buldyrev, V. N. Ryzhov, and H. E. Stanley, eds., *New Kinds of Phase Transitions: Transformations in Disordered Substances* Proc. NATO Advanced Research Workshop, Volga River (Kluwer, Dordrecht, 2002). Citations: 33
- (xvi) F. Family, M. Daoud, H. Herrmann and H. E. Stanley, eds., *Scaling and Disordered Systems: Workshop Honoring Antonio Coniglio on his 60th Birthday* (World Scientific Publishers, Singapore, 2002).
- (xvii) H. Taitelbaum, A. Bunde, R. Kopelman, Y. Lereah and H. E. Stanley, eds *Randomness and complexity - Proceedings of the - International Workshop in honor of Shlomo Havlin's 60-th birthday, Eilat, Israel, 5-9 January 2003* (Elsevier, Amsterdam, 2000). [Special issue of Physica A, vol. **330**, pp. 1-303.]
- (xviii) H. E. Stanley, M. Ausloos, J. Kertesz, R. N. Mantegna, J. A. Scheinkman, and H. Takayasu [eds] *Proceedings of the International Econophysics Conference, Bali* (Elsevier, Amsterdam, 2003).
- (xix) F. Mallamace and H. E. Stanley [eds.], *The Physics of Complex Systems: New Advances and Perspectives* [Proc. 2003 Enrico Fermi School International School of Physics, Course CLV, Course CLV] (Soc. Italiana Fisica, Bologna, 2004).
- (xx) H. E. Stanley, E. Balcells, E. Ruiz-Geli, M. Dominguez, P. Puigdomenech, S. Rovira, O. Pibernat, J. Ros, M. J. Pico, P. Noguera, R. Salecl, H. Lieberman, J. Pigem, L. Fananas, D. Jou, L. Reales, S. Jorda, J. Scott, C. Gelabert, O. Vilarroya, M. Maso, M. Maso, J. Roca, and J. Perello, *Fora d'equilibri: encontre internacional noves fronteres de la ciencia, l'art i el pensament* (Generalitat de Catalunya Departament de Cultura i Mitjans de Comunicacio, 2008).
- (xxi) H. E. Stanley, A.-L. Barabási, J. B. Bassingthwaighte, B. L. Bassler, D. K. Campbell, S. W. Chisholm, J. S. Langer, S. A. Levin, M. E. Paté-Cornell, M. A. Savageau, D. Valle, and M. Vidal [eds], *Complex Systems: Task Group Summaries* (The National Academies Press, Washington DC, 2008).
- (xxii) F. Mallamace and H. E. Stanley [eds.], *Complex Materials in Physics and Biology* [Proc. 2010 Enrico Fermi School International School of Physics, Course CLXXVI] (Soc. Italiana Fisica, Bologna, 2012).
- (xxiii) H. E. Stanley, Ed. *Liquid Polymorphism*, volume 152 in the series *Advances in Chemical Physics* (S. A. Rice, Ed). Wiley, NY, 2013.
- (xxiv) D. Matrasulov and H. E. Stanley [eds], *Nonlinear Phenomena in Complex Systems: From Nano to Macro Scale*, Proceedings of NATO Advanced Research Workshop, Tashkent, Uzbekistan, May 2013 (Springer, Dordrecht, 2014).
- (xxv) I. Florescu, M. C. Mariani, H. E. Stanley, and F. G. Viens [eds.], *Handbook of High-Frequency Trading and Modeling in Finance* (Wiley, New York, 2016).

5 Encyclopedia Articles

- (i) H. E. Stanley, “Critical Phenomena” in *Encyclopedia of Physics* (Ed. R. M. Besancon). Van Nostrand and Reinhold Publ. Co., N.Y. 1974. p. 180–185.

623 Articles, in the period 1966–1999
[Listed in rank order by citation count]

NOTE: 605 Articles for the period 2000–present are listed separately below

cmtfac@buphy.bu.edu

- (i) C. K. Peng, S. V. Buldyrev, S. Havlin, M. Simons, H. E. Stanley and A. L. Goldberger, “Mosaic Organization of DNA Nucleotides” *Phys. Rev. E* **49**, 1685–1689 (1994). Citations: 2,318
- (ii) C. K. Peng, S. Havlin, H. E. Stanley, and A. L. Goldberger, “Quantification of Scaling Exponents and Crossover Phenomena in Nonstationary Heartbeat Time Series,” *Chaos* **5**, 82–87 (1995). Citations: 1,817
- (iii) O. Mishima and H. E. Stanley, “The relationship between liquid, supercooled and glassy water” *Nature* **396**, 329–335 (1998). Citations: 1,202
- (iv) R. N. Mantegna and H. E. Stanley, “Scaling Behaviour in the Dynamics of an Economic Index” *Nature* **376**, 46–49 (1995). Citations: 1,108
- (v) P. H. Poole, F. Sciortino, U. Essmann, and H. E. Stanley, “Phase Behavior of Metastable Water” *Nature* **360**, 324–328 (1992). Citations: 1,093

- (vi) C. K. Peng, S. Buldyrev, A. Goldberger, S. Havlin, F. Sciortino, M. Simons and H. E. Stanley, “Long-Range Correlations in Nucleotide Sequences” *Nature* **356**, 168-171 (1992). Citations: 955
- (vii) P. Ch. Ivanov, L. A. N. Amaral, A. L. Goldberger, S. Havlin, M. G. Rosenblum, Z. Struzik, and H. E. Stanley, “Multifractality in Human Heartbeat Dynamics” *Nature* **399** 461-465 (1999). Citations: 907
- (viii) H. E. Stanley and J. Teixeira, “Interpretation of The Unusual Behavior of H₂O and D₂O at Low Temperatures: Tests of a Percolation Model” *J. Chem. Phys.* **73**, 3404–3422 (1980). Citations: 712
- (ix) G. M. Viswanathan, S. V. Buldyrev, S. Havlin, M. G. da Luz, E. Raposo, and H. E. Stanley, “Optimizing the Success of Random Searches” *Nature* **401**, 911-914 (1999). Citations: 711
- (x) C. K. Peng, J. Mietus, J. Hausdorff, S. Havlin, H. E. Stanley, and A. L. Goldberger, “Long-Range Anticorrelations and Non-Gaussian Behavior of the Heartbeat” *Phys. Rev. Lett.* **70**, 1343-1346 (1993). Citations: 685
- (xi) G. M. Viswanathan, V. Afanasyev, S. V. Buldyrev, E. J. Murphy, P. A. Prince, and H. E. Stanley, “Lévy Flight Search Patterns of Wandering Albatrosses” *Nature* **381**, 413–415 (1996). Described in “Trails of the Wandering Albatross: Applying the mathematics of haphazard motion”, *Science News* **150**, 104-105 (17 Aug 1996). Citations: 623
- (xii) A. Aharony, R. J. Birgeneau, A. Coniglio, M. A. Kastner and H. E. Stanley, “Magnetic Phase Diagram and Magnetic Pairing in Doped La₂CuO₄” *Phys. Rev. Lett.* **60**, 1330-1333 (1988). *Science Citation Index*: among 100 most-cited articles of 1988. Citations: 616
- (xiii) V. Plerou, P. Gopikrishnan, B. Rosenow, L. A. N. Amaral, and H. E. Stanley, “Universal and Non-Universal Properties of Cross-Correlations in Financial Time Series” *Phys. Rev. Lett.* **83**, 1471-1474 (1999). (Described in detail in “The Market Isn’t all Random” [Physical Review Focus, 18 August 1999 (<http://focus.aps.org/v4/aug99.html>)].) Reprinted in *Financial Econometrics*, edited by A. Lo (Edward Elgar Publishing, 2006). Citations: 591
- (xiv) P. Gopikrishnan, V. Plerou, L. A. N. Amaral, M. Meyer, and H. E. Stanley, “Scaling of the Distributions of Fluctuations of Financial Market Indices” *Phys. Rev. E* **60**, 5305-5316 (1999). cond-mat 9905305. Citations: 520
- (xv) Y. Liu, P. Gopikrishnan, P. Cizeau, M. Meyer, C.-K. Peng, and H. E. Stanley, “The Statistical Properties of the Volatility of Price Fluctuations” *Phys. Rev. E* **60**, 1390–1400 (1999). cond-mat 9903369. Citations: 492
- (xvi) R. N. Mantegna and H. E. Stanley, “Stochastic Process with Ultra-Slow Convergence to a Gaussian: The Truncated Lévy Flight” *Phys. Rev. Lett.* **73**, 2946–2949 (1994). Citations: 460
- (xvii) H. E. Stanley, “Spherical Model as the Limit of Infinite Spin Dimensionality” *Phys. Rev.* **176**, 718–721 (1968). Reproduced in a compendium of the top 1000 papers of the past 100 years: *The Physical Review: The First Hundred Years. A Selection of Seminal Papers and Commentaries* H. H. Stroke, Ed, (AIP Press, NY, 1995). Also reproduced as Chapter 1 of Brézin/Wadia [eds] *The Large-N expansion in Quantum Field Theory and Statistical Physics* (World Scientific, Singapore, 1993). Citations: 446
